

## Oil Burner Service & Repair

With oil heat still playing a major role in the heating industry and homes converting to NG or LP slowing down. There are fewer and fewer technicians that are trained on how to set up and adjust an oil burner properly.

Come learn from a professional service-person.

### Our Trainer

**Nancy Imhoof** is highly skilled in all aspects of heating, air conditioning installation & service, boilers & on-demand water heaters, and generators. She has been actively supporting Supply New England's customer base since July 2009 by assisting our rapidly growing air conditioning & generator business, as well as boiler support.

## Training Topics:

- Introduction to Oil Burners
- Oil Tanks and Piping
- Fuel Units & Oil Valves
- Nozzles & Chamber
- Draft & Venting
- Combustion-Testing & Troubleshooting
- Basic electricity and ignition systems
